MASS PRODUCTION MEANS SAVINGS TO YOU.

Easy Erection with no costly job site welding - the framing bolts together and roof panels fasten to frame with self-drilling screws!

The baked-on mill finish is available in a choice of colors and adds eye appeal to any building. The finish lasts for years without any maintenance.

Engineered for your area. American's pre-fabricated structures are designed for wind and snow load requirements in various parts of the U.S.

American Pre-Fabricated Structures will furnish you with cost estimates. Engineering calculations and drawings, certified by Registered Professional Engineers, are submitted when required for building permit approval.
